

Knit for All Seasons, from Fine Summer Knits to Bulky Winter Wear

The SK 860 is the newest knitting machine and the first of its kind anywhere! With a 6.5 needle pitch, the SK 860 is designed to work with all the yarns typically used by hand knitters. By knitting yarns that fall in the top range for a standard gauge machine and in the lower range for a chunky machine, this machine can deliver the best of both worlds.

Add Concept and you have a winning team!!

Concept creates a link between your computer and the Silver Reed Electronic Knitting Machines. It opens a world of design potential. Create your own stitch patterns. Open basic shape files apply your stitch gauge and receive on screen knitting instructions.

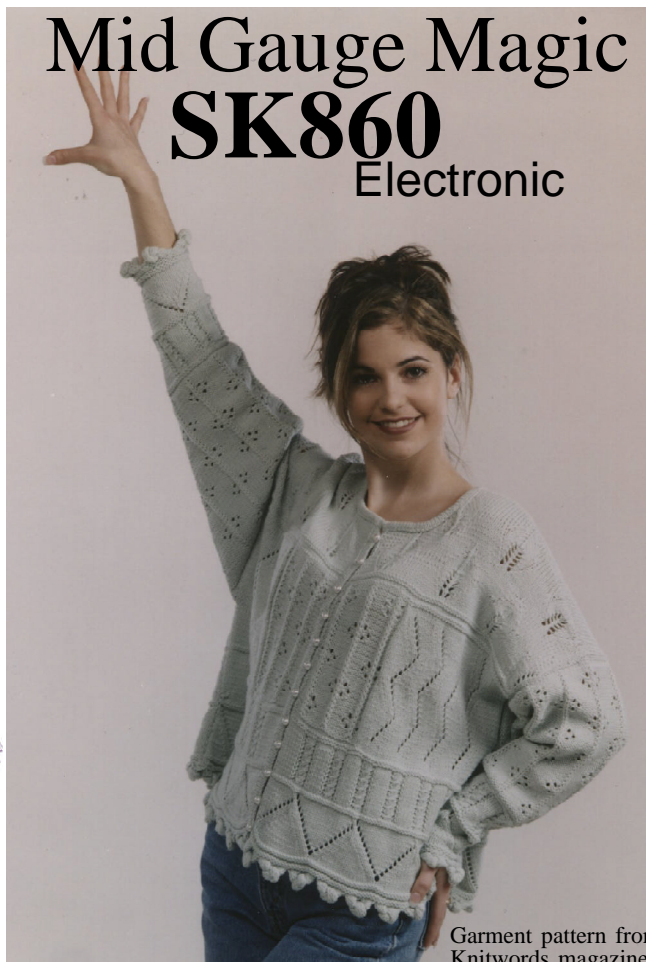

Beginners Corner The SK 160

Mid Gauge Manual Knitting machine offers the same bed as the SK 860 with a non patterning carriage. This machine allows you to start with a basic machine that you will never out grow because it grows with you. Learn the basic operation of the machine then add the optional Electronic carriage and Concept when you are ready.

Open new possibilities in home knitting..
